Highlights

1. Unpacking the Loss and Damage Fund: Implications for Women and Girls in the Low Income Countries

Climate change is a 'threat multiplier', the effects of which are compounded for women and girls. The aim of the loss and damage fund is to provide financial assistance to poorer countries as they respond to the negative consequences of climate change.

- What is the harm caused to women and girls by climate change?
- What are the best funding arrangements for responding to loss and damage while paying attention to gender disparities?
- How should the Loss and Damage Fund be paid for?

This presentation will explore some of the opportunities for accountability and advocacy for gender equality as deliberations around loss and damage progress at COP28.

Speaker: **Dr. Rachel Masika**

2. Elevating Sustainable Agriculture to the forefront of Climate Action

COP28 is expected to foster a global movement towards regenerative agriculture, empowering smallholder farmers, promoting agroecological practices, tackling food waste and loss, and mobilizing the necessary financial resources.

- How can COP28 catalyze a transformative shift towards sustainable food systems that nourish both people and planet.
- What are the priority policy options towards meeting the global targets for Sustainable agriculture in the Global South?
- What do we want to hear at the Global Stock take?

Speaker: **Michael Murigi**

3. Empowering Businesses in driving the Circular Economy: Key Strategies and Considerations

The 50 by 2050 Strategy proposed by the Global Waste Initiative at COP27 presents an opportunity for businesses to reevaluate their waste management practices. Embracing Circular Economy principles and Sustainable Waste positions businesses as responsible stewards of the environment and enhances their Corporate Social Responsibility and reputation. Let's explore:

- The link between the Global Stocktake, adaptation, and solid waste management Business Strategies for the Circular Economy
- The Significance of System Thinking and Circularity in Decarbonization

Speaker: **Dr. Isabela Bonatto**

Expert Speakers

Dr. Rachel Masika

Dr. Rachel Masika is a distinguished gender and global development consultant specializing in climate change, digital technologies, and urbanization.

Michael Murigi

Michael Murigi is a distinguished impact evaluation expert and economist, with over 12 years of experience in developing, translating, and executing impact measurement and learning strategies across a wide spectrum of domains including agricultural value chains, climate change adaptation and mitigation, clean energy, youth and women empowerment, financial inclusion, education, and training.

Dr. Isabela Bonatto

Dr. Isabela Bonatto is an environmental consultant specializing in urban solid waste and circular economy, with expertise in recycling, reverse logistics, socio-environmental projects, and waste research. She is a biologist with an MBA in Environmental Management, as well as a Master's and a Doctorate in Environmental Engineering.
